Useful Information

1.1 STRUCTURE

All the information about the exhibition center can be found in the QE file, to be downloaded in the Bergamo Fair Web Area.

1.2 SUMMARY

REQUEST FOR ANTICIPATING FITTING ACTIVITIES

Exhibitors that need to anticipate fitting activities must contact Promoberg by email: **sate@promoberg.it**
Before April 20th, 2024
 The acceptance of the request is subject to evaluation by Promoberg.

DIFFERENT EQUIPMENT

Exhibitors who realize the equipment of stands by their own must send the complete technical project at **sate@promoberg.it**
No later than February 29th, 2024

OFFICIAL SUPPLIERS

The complete list of Promoberg official suppliers can be found in the QE file, to be downloaded in the Bergamo Fair Web Area.

FORKLIFT SERVICE

During fitting and dismantling times the forklift service will be provided; there will be 2 forklifts with 30 and 50 q. loading capacity.
 To book this service, exhibitors must fill in the **form "G"** and send it to **sate@promoberg.it**

ENTRY PASS

In order to obtain entrance passes exhibitors must log-in in the Bergamo Fair Web Area by using Username and Password received by email from:

info@industrialvalvesummit.com

In the Web Area is also possible to download the guidelines explaining how to use the system.

NB: Those exhibitors who realize the stand equipment by their own are obliged to make their suppliers register in the Web Area, so that they can print entrance passes

By April 30th, 2024

DATA FOR THE OFFICIAL EXHIBITOR CATALOGUE

In order to check and modify company data, exhibitors must log-in in the Bergamo Fair Web Area by using Username and Password received by email from

info@industrialvalvesummit.com

By April 15th, 2024

Useful Information

1.3 SECURITY

General security rules to be observed in the exhibition center can be found in the QE file to be downloaded in the Bergamo Fair Web Area.

Security forms for those exhibitors who realize the equipment of stands by their own can be found in this guide, from the page 8.

1.4 INSURANCE

The cumulative insurance included in the registration fee covers the fire risk (theft and damage excluded). For further information see the participation contract, art. 28 - 29 - 30 - 31.

If the exhibitor should require additional insurance, contact:

MAG - JLT (Ref. Chiara Comi)
24122 BERGAMO Via F.lli Calvi, 15
Phone. 035 45.27.111 - Fax 035 31.35.51

1.5 SERVICES INCLUDED IN THE REGISTRATION FEE

The registration fee includes the following service:

- * E3 kW of electricity supply (220 V)
- * Wi - Fi connection
- * General advertising of the event
- * Inclusion of the exhibitor in the official catalogue of the event (printed, free for visitors, and online)
- * Cumulative insurance that includes: fire and third party liability (theft and damage excluded)
- * Check of the correct installation of the electrical system and the correct assembly of materials used for the fitting of stand
- * Fire surveillance by firemen
- * General day and night surveillance
- * Cleaning of common areas
- * City tax for advertising promotion
- * Photographs and videos during the opening days

1.6 TECHNICAL DETAILS

The standard height of stand walls is 3,00 m; if exhibitors need to go higher than 3m, they have to send the project of the stand to the Responsible for Security Office: sate@promoberg.it and they must respect the rules in the Exhibitor Book, to be downloaded in the Bergamo Fair Web Area.

1.6.1 HALL “C”

Pavilion “C” is a temporary modular tent, the structure is made of anodized aluminum, the cover and the perimeter closure are made of white blackout curtains. The internal perimeter of the pavilion is fitted out with wooden walls white painted. The pavilion’s flooring is made of floating wood, and its maximum capacity is 600 kg/sqm. For this reason, it is not possible to access to this area with a forklift for moving heavy loads. The access gates to this structure have dimensions: 4.5 m wide x 3.5 m high.

¹ If it is not possible to hold the labeling of the CE marking must be accompanied by the CE declaration or certification of conformity.

TO BE COMPLETED IF THE SET-UP DISPLAYS RISKS NOT INDICATED IN THE ASSESSMENT AND COORDINATION DOCUMENT PREPARED BY PROMBERG

LEGISLATION CONCERNING THE OCCUPATIONAL SAFETY HAS BEEN INNOVATED BY THE LAW OF AUGUST 3, 2007 123 IN COMPLIANCE WITH ITALIAN LEGISLATIVE DECREE 9/04/08 N.81 AS MODIFIED BY LEGISLATIVE DECREE 3/08/09 N.106. This complex includes new provisions on the issues of risks arising from interference and, in particular, species that "employers, including, subcontractors cooperate in implementing measures to prevent and protect against risks of workplace accidents during the work activity covered by the contract stating that the same subjects "coordinate procedures to prevent and protect against the risks to which workers are exposed by sharing information in order to eliminate risks due to interference between the work of the various companies involved in work as a whole".

For this reason, Ente Fiera Promoberg assessed the risks to which people are exposed in the access and / or work in the neighborhood and the possible measures to reduce and / or eliminate these hazards.

It is evident that these risks are related to ordinary activities in the exhibition, so the exhibitor or its subcontractors calculating risks specific to the nature of work / type of equipment / operations provided, are obliged to notify the technical office for the reevaluation of the specific risks and coordination / communication with other operators of the organizer.

In this regard, in order to satisfy the procedural and provide a useful tool for exhibitors, to protect them in contract work and at the same time ensure that the Fair Authority in this way will draw up a plan of coordination and interference assessment in line with the real dangers is deemed necessary to all the forms attached to those risks that have occurred not be considered by Promoberg.

DECLARES

under his own responsibility, that the system was built in accordance to the rule of art, as provided for by Article 6, taking into account the operating conditions and the uses to which it is intended, having in particular

- respected the project prepared pursuant to Article 5 by _____
- having followed the technical standard applicable to the use (3). Rif. Rules CEI 64/08 and CEI 64/08 sez.711 for temporary electrician systems for exhibitions and shows
- having installed components and materials adequate at the place of installation (art.5 and 6);
- having checked the system for safety and function successfully, having carried out the checks required by the rules and regulations.

Binding attachments:

- project designed based on art. 5 and 7 (4);
- documents with types of materials used (5);
- system diagram realized;
- reference to declarations of conformity previous or partial existing (7);
- copy of the certificate of recognition of technical and professionals requirements.

Optional attachments (8):

DECLINES

any liability for accidents to persons or property resulting from tampering by a third party or from lack of maintenance

date _____

The technical manager

The registrant

(sign and stamp)

(sign and stamp)

FOR THE CLIENT: responsibility of the developer or owner, Art. 8 (9)

Legend key:

- 1) as an example in the case of gas plants, with "other" could mean the replacement of an appliance installed in a fixed way.
- 2) indicate: name, surname, qualification and, where recourse obligation under Article 5/2, details of registration in the Register for professional technician who prepared the project.
- 3) Specify the technical standards and law, distinguishing between those related to the planning, execution and follow-up.
- 4) if the system declared on the project is changed in progress, the project forwarded at the end of the work must include generalized variations realized during construction. It is part of the project the fire prevention file (if required).
- 5) The report shall contain, for products subject to standards, the declaration of compliance completed, with references to trademarks test certificates, etc.. issued by authorized institutions.
For other products (to be listed), the petitioner must declare that the materials, products and components comply with Articles 5 and 6.
The report shall state the suitability compared to venue of installation.
When important for the proper functioning of the system, must be provided information on the number and characteristics of the installed or installable devices (for example for gas: 1) the number, type and power of the equipment, 2) characteristics of the components of the ventilation system premises, 3) characteristics of the exhaust system products combustion: 4) information on the electrical connection of devices, if applicable).
- 6) For the system scheme built it is intended the description of the project as realized (a simple reference to the project as this was written by a qualified professional and have not made any variations during construction).
In the case of transformation, extension and maintenance, the work must be framed, if possible, in the scheme of the already existing.
The scheme shall quote the fire prevention (if required).
- 7) References are composed of the name of the contractor and the date of declaration. For plants or parts of plants built before the entry into force of this decree, the reference to declarations of conformity may be replaced by a reference to statements of compliance (art. 7/6).
If a part of the system was built by another company (for example, ventilation and flue gas in gas systems), the declaration must contain similar references to the parties.
- 8) Example: Any certificates of the results of test performed on the first start-up or treatment for cleaning, disinfection, etc.
- 9) At the conclusion of the installation the company is required to issue the customer the declaration of conformity of equipment in accordance with the rules laid down in Article 7. The client or the owner is obliged to entrust the work of installation, conversion, expansion and maintenance of the facilities referred in article 1, and companies authorized within Article 3.
